

SUMMARY

Innovative Full Stack Software Engineer (AZ-204) with nearly 4 years of experience delivering scalable enterprise applications with **.NET Core, React, and Azure**. Highly proficient in Microsoft backend stack, REST APIs, and Clean Architecture. Proven track record of architecting high-availability SaaS solutions, optimizing cloud workflows, and driving technical excellence in Agile environments.

- **Backend Frameworks:** C#, .NET Core, ASP.NET Core, Microservices Architecture, RESTful APIs, Web APIs
- **Frontend Frameworks:** React.js, Redux, TanStack Query, Tailwind CSS, D3.js, Leaflet.js, jQuery
- **Cloud & DevOps:** Microsoft Azure (App Services, Functions, Service Bus, App Insights), CI/CD Pipelines, Azure DevOps(ADO), Git, Docker
- **Databases:** SQL Server, Microsoft SQL Server, Entity Framework Core, T-SQL, Data Modeling
- **AI Frameworks & LLMs:** Anthropic Claude, Hugging Face Agents, ChatGPT (RAG Workflow implementation)
- **Certifications:** Microsoft Azure Developer Associate – **AZ 204**, Microsoft Azure Fundamentals – **AZ 900**
- **Awards & Achievements:** Open-Source Contributor – Hacktoberfest 2025 Level 5, Employee of the Quarter (Jan-Mar) – 2024

Korbyt, Software Engineer

Sep 2022 – Present

- Engineered high-availability SaaS applications using .NET Core, React, and Azure App Services, delivering **15+** complex features that improved overall system scalability and reduced UI rendering times by **35%**.
- Architected scalable .NET Core backend services for an AI-powered booking chatbot in Microsoft Outlook (M365), enabling automated conversational scheduling powered by **ChatGPT 5.2** and RAG workflows.
- Built automated API testing suites with Postman and Jest integrated into Azure DevOps CI/CD pipelines across **70+** RESTful endpoints, cutting regression QA effort by **30%**.
- Implemented enterprise third-party REST API integrations (Zoom) utilizing **OAuth 2.0** and JWT-based authentication to ensure secure end-to-end communication.
- Engineered high-throughput SQL Server and .NET Core data pipelines processing **10,000+** records/day, optimizing stored procedures for enhanced query speed and data integrity.

DreamTek Industries, Intern

March 2022 - July 2022

- Implemented backend API endpoints for an Augmented Reality platform using **Node.js, Express, and Azure Functions**, creating flowcharts to define scalable REST API workflows.

Concierge AI (React.js, .NET Core API, Azure)

- Developed an intelligent, secure conversational booking system from scratch, building scalable backend services via ASP.NET Core and RESTful APIs.
- Implemented complex background processing and message-handling architectures, ensuring highly performant data routing and secure operations in regulated environments (OAuth 2.0).

Workspace Floorplan Booking (React.js, JavaScript, D3.js, .NET Web API)

- Designed a full-stack booking solution handling high volumes of concurrent requests, utilizing modern JavaScript and React.js for the UI and .NET Web API for scalable backend processing.
- Architected and developed scalable Microservices and high-performance RESTful APIs utilizing C#, ASP.NET Core, and .NET Core, adhering strictly to Clean Architecture frameworks and SOLID design principles.
- Built a full-stack facility management solution applying modern web development standards (HTML5/CSS/JavaScript) to deliver a highly interactive user interface.

Onlook – Open-Source Contribution (React.js, TypeScript, Supabase, MobX) - [link](#)

- Implemented key features such as a Zoom panel and element visibility toggling using TypeScript and assisted in integrating AI chat functionality. Collaborated closely with co-founders to optimize modular architecture, improving rendering performance by 20%.

EDUCATION

- **Jawaharlal Nehru Technological University, Bachelor of Technology (CSE)**
CGPA: 8.9/10

July 2016 – August 2020
